PROFILE

Full-Stack Web Developer with solid professional experience building and maintaining production-level web applications using React, Node.js, Express, and MongoDB. Experienced in designing scalable REST APIs, deploying applications on VPS environments, and managing containerized infrastructure with Docker.

I focus on writing maintainable, scalable code and building systems that are reliable under real-world usage. I am comfortable working across the full stack, from frontend architecture to backend logic and server deployment.

Strong background in technical diagnostics and engineering, which translates into a structured, analytical approach to software development and system design.

TECH STACK

Frontend

- React.js
- JavaScript (ES6+)
- Tailwind CSS
- HTML5
- CSS3
- Responsive UI Architecture

Backend

- Node.js
- Express.js
- MongoDB
- REST API Design
- Bun

DevOps & Deployment

- Docker / Docker Compose
- Nginx
- VPS Deployment (Ubuntu)
- Server Configuration & Management
- SSL (Let's Encrypt)
- SSH / SFTP

Tools & Workflow

- Git (Version Control)
- GitHub / GitLab
- API Integration
- Debugging & System Troubleshooting
- Agile Development Workflow

PROJECTS

PatrolMate

Full-Stack Application | React • Node.js • Express • MongoDB • Docker

Production-oriented workflow management system designed for task tracking and structured data handling.

Key Contributions:

- Designed and implemented full-stack architecture
- Built scalable REST API with authentication layer
- Developed responsive React frontend with reusable components
- Designed MongoDB data models for structured task management
- Containerized application using Docker for deployment consistency
- Deployed and maintained application on VPS environment

Repository:

<https://github.com/ValkovD/patrolmate>

Live:

<https://patrolmate.pdeit.com>

StarterNator Bank

MERN Stack Application | React • Node.js • Express • MongoDB

Data-driven application for managing and analyzing vehicle fault records with structured backend and interactive frontend.

Key Contributions:

- Developed full-stack MERN architecture
- Implemented API layer with validation and data handling logic
- Built responsive dashboard interface for data interaction
- Designed component-based frontend architecture
- Structured MongoDB schema for scalable data storage

Repository:

<https://github.com/ValkovD/StarterNator-Bank>

Live:

<https://starternator.pdeit.com/>

Expense Tracker

Frontend Application | HTML • JavaScript • CSS

Expense management application that demonstrates core programming principles, clean UI development, financial tracking functionality, and user-friendly experience.

Key Contributions:

- Built dynamic state-driven UI for expense tracking
- Implemented responsive frontend architecture
- Designed clean component structure with reusable logic
- Handled client-side data updates and calculations
- Back end like use of the browser local storage

Repository:

<https://github.com/ValkovD/Expense-Tracker>

Live:

<https://expense.pdeit.com/>

Personal Portfolio Website

Frontend Application | React • Tailwind CSS

Developer portfolio built to showcase projects, technical skills, and frontend architecture skills.

Key Contributions:

- Designed and implemented responsive UI/UX layout
- Built modular component structure for scalability
- Optimized performance and mobile-first design
- Integrated project showcase and navigation system

Repository:

PROFESSIONAL EXPERIENCE

RSS Patrol — The AA, London South East

Nov 2015 – Aug 2025

Technical roadside operations role focused on real-time diagnostics and problem resolution in high-pressure environments.

Responsibilities & Impact:

- Diagnosed and resolved complex mechanical and electrical faults under time pressure
- Applied structured troubleshooting methodology in critical situations
- Communicated technical issues clearly to customers and internal teams
- Developed strong decision-making skills in high-stress environments

This role strengthened my ability to approach software problems systematically and deliver reliable solutions under constraints.

Diagnostic Engineer — Trust Ford, East London

Feb 2014 – Nov 2015

Specialized in advanced vehicle diagnostics and resolution of complex technical failures.

Responsibilities:

- Performed deep system diagnostics using specialized tools and software
- Analyzed complex mechanical/electronic issues and documented findings
- Collaborated with engineering and warranty teams

Developed strong analytical and systems-thinking skills directly transferable to software engineering.

Previous Technical Roles

2006 – 2014

Held multiple engineering and technical positions across automotive and service environments:

- Diagnostic Mechanic
- Engine Rebuild Specialist
- Tractor Engineer
- Service Advisor
- Spare Parts Advisor

Core Skills Developed:

- Systems troubleshooting and root cause analysis
 - Process optimization and workflow improvement
 - Technical communication and documentation
 - Working with complex mechanical and software-based systems
-

EDUCATION

Master's Degree in Business Management

Tsenov Academy of Economics — Svishtov, Bulgaria

Focused on:

- Leadership and organizational strategy
- Business systems and process analysis
- Analytical decision-making

Bachelor's Degree in Business Management

Tsenov Academy of Economics — Svishtov, Bulgaria

Focused on:

- Business fundamentals
- Communication and team coordination
- Structured problem solving

Technical High School “N.Y. Vaptsarov” — Haskovo

Internal Combustion Engines & Vehicle Repair

Practical foundation in:

- Mechanical diagnostics
- System repair and troubleshooting
- Engineering fundamentals

ADDITIONAL STRENGTHS

- Strong systems thinking and problem-solving ability
- Experience working on production-level applications
- Ability to design and implement scalable backend systems
- Comfortable owning features end-to-end
- Strong debugging and root-cause analysis skills
- Independent and self-directed worker
- Continuous learning and improvement mindset

LANGUAGES

- Bulgarian — Native
- English — Professional Working Proficiency
